

# WORKSHOP INVITATION

#Project development  
#Green buildings  
#Smart Energy Systems  
#Recycling of Construction Materials

Politically there is a wish to accelerate innovation and collaboration in the Femern Belt corridor. With that follows earmarked funding.

The organizers aim to develop a new Danish-German interreg-project centered around buildings, smart energy systems and recycling of construction materials.

The budget is 5 mio Euro of which 3-4 mio Euro is funding for innovation cooperations between companies, knowledge institutions and public organizations.
